1. Qualitative Information on Quarterly Consolidated Financial Performance

(1) Explanation of operating results

During the nine-month period ended December 31, 2025, the Japanese economy recovered moderately. While improvements in the employment and income environment and the effects of various policies are expected to support a moderate recovery, continued attention must be paid to the risk of an economic downturn due to the impact of U.S. trade policies, the potential impact of continued price increases on personal consumption, and fluctuations in financial and capital markets.

Under these circumstances, Team Nojima (*1) has aimed to be a strong team where each business combines its strengths to create synergy, with the ambition of contributing to society through digital products and services and has conducted "consulting-based sales" from the customer's perspective.

As a result, for the nine-month period ended December 31, 2025, net sales were 713,928 million yen (115.8% compared to the same period in the previous year), operating income was 40,611 million yen (125.0% compared to the same period in the previous year), ordinary income was 45,040 million yen (129.4% compared to the same period in the previous year), and net income attributable to shareholders of the parent company was 29,192 million yen (126.5% compared to the same period in the previous year). Net sales and operating income reached record highs. Ordinary income and net income attributable to shareholders of the parent company also reached record highs, excluding investment gains from the equity method applied to Suruga Bank Ltd. and others in the fiscal year ended March 2021. EBITDA (*2), which our Group regards as a key management indicator, was 63,426 million yen (116.7% compared to the same period in the previous year), marking a record high.

(*1) Nojima companies are referred to as "Team Nojima" based on the idea that they are a team that shares the common goal of "contributing to society and delighting customers" and demonstrating each other's strengths to achieve this.

(*2) EBITDA = Ordinary income + Interest expenses + Interest on bonds + Depreciation + Amortization of goodwill - Gain or loss on equity method investment

The situation for each segment is as follows.

Following the inclusion of VAIO Corporation in the scope of consolidation in the previous fiscal year, "Product business" was added to the reporting segments.

From the first quarter of the current consolidated fiscal year, the "Paid satellite broadcasting business," previously included in "Other," and "Street Holdings Corporation and its subsidiaries" (BCJ-59, Street Holdings Corporation, and its 3 subsidiaries were dissolved via an absorption-type merger with NJM2 Corporation as the surviving company on December 1, 2025, and the surviving company changed its trade name to Street Corporation), which were included in the scope of consolidation, have been added to the reporting segments as "Media business"

In accordance with this change, segment information for the previous nine-month period has been reclassified to the new reporting segment categories.

(Operation of digital home electronics retail stores)

In the home electronics retail industry, despite the impact of high prices, overall performance was solid due to winter bonus sales and replacement demand accompanying the end of "Windows 10" support.

Under these circumstances, we continued "consulting-based sales" tailored to customer needs. Promotional measures included "Black Friday" and campaigns using popular characters, which were well-received by many customers.

Regarding store development, we are proceeding with efficient store creation, including dominant expansion centered on the Tokyo metropolitan area, opening small-format stores, and optimizing existing stores, while working to provide a comfortable shopping environment using digital technology.

As a result, net sales were 245,619 million yen (109.6% year-on-year), and ordinary income was 15,187 million yen (105.5% year-on-year). Net sales reached a record high.

(Operation of mobile carrier stores)

In the carrier shop industry, customer retention of young people is becoming active due to measures such as "U22 discounts" by telecommunications carriers. In addition, there is a shift towards comprehensive life support proposals that provide convenience and peace of mind, close to customers' diverse needs in their daily lives, through initiatives to expand the "economic zone" by deepening peripheral fields such as finance and payment services starting from communication services.

Team companies continued store operations that delight customers by providing security-related services that lead to safety and peace of mind. We continue to focus on strengthening the organizational foundation through human resource development and improvement of customer service quality. We are also proceeding with the implementation of new measures in response to the amended Telecommunications Business Act enforced in December.

As a result, net sales were 285,459 million yen (107.1% year-on-year), and ordinary income was 18,165 million yen (161.8% year-on-year). Net sales and ordinary income reached record highs.

(Internet business)

As the importance of ultra-high-speed broadband as a daily life infrastructure increase, Nifty continues to challenge the realization of a comfortable communication environment for customers. As part of this, we developed a home line diagnosis app and obtained a patent. This system will be installed in the Nojima app this year, and we will strengthen cooperation with team companies to improve satisfaction with line quality through creating experiences where customers can feel the comfort of internet usage.

Meanwhile, Cecile promotes "product creation that stays close to customers." By disseminating examples of improvements based on customer feedback, we demonstrate a corporate stance of facing customers sincerely.

As a result, net sales were 54,920 million yen (103.6% year-on-year), and ordinary income was 5,078 million yen (96.4% year-on-year)

(Overseas business)

In Singapore, we carried out active promotional activities to coincide with the 60th anniversary of the nation's founding. We continue to proceed with new initiatives to encourage store visits, along with renovations of existing stores to delight customers.

In Malaysia, there are concerns about a decline in consumer behavior in the overall market due to the expansion of the scope of service and sales tax introduced in July this year. In COURTS' strength, its own installment credit, we have started a new plan system suitable for the product group provided and each region in consideration of customer needs. As a result, net sales were 64,580 million yen (106.1% year-on-year), and ordinary income was 629 million yen (136.1% year-on-year). Net sales reached a record high.

(Financial business)

On August 13, 2025, we transferred all issued shares of Money Square Holdings, Inc. and Money Square, Inc., excluding them from the scope of consolidation. As a result, the disclosure of the financial segment is scheduled to disappear in the next fiscal year.

The results prior to exclusion were net sales of 1,851 million yen (43.6% year-on-year) and ordinary income of 437 million yen (38.1% year-on-year).

(Product business)

Although there are concerns about a decrease in corporate demand due to a pause in replacement special demand accompanying the end of support (EOS) for Windows 10, VAIO maintains steady progress. While soaring market prices and supply shortages due to global tightness in memory demand have become apparent, VAIO has secured a stable supply system. Sales for individuals are progressing well, centered on Nojima stores. As a promotional measure, we jointly deployed Japan's first (*3) "Battery Warranty Service".

Additionally, following the change of Representative Director in December, we will further deepen synergy with team companies and aim for further growth under a solid cooperation system.

As a result, net sales were 47,482 million yen, and ordinary income was 3,751 million yen. Transitioning at the highest level in the past 10 years.

(*3) As a manufacturer's standard warranty (free incidental to the main unit) for notebook PCs for corporations and individuals sold in Japan, guaranteeing battery aging due to use exceeding one year. As of November 2025, researched by Stella Associates.

(Media business)

Although competition in the paid satellite broadcasting market is intensifying, AXN Co., Ltd. strengthened content procurement to expand viewers and improve satisfaction. Animax Broadcast Japan Inc. promoted efficiency in the operational structure through a merger with Kids Station Inc. Additionally, we are investing in the event content business, such as by planning to host large-scale events, and are proceeding with the development of new customers.

Street Corporation is deploying comprehensive direct marketing support by integrating TV and digital. As a "venture in its first year of founding," it is breaking out of the comfort zone (status quo) and continuing to challenge new value creation without fear of failure.. We have been working to create new value, such as by innovating production processes in the TV business and developing new services in the web business, to support the business expansion of our client companies.

As a result, net sales were 18,606 million yen (203.7% year-on-year), and ordinary income was 1,130 million yen (67.1% year-on-year).

(Stores in operation)

In the operation of digital home electronics retail stores, through scrap-and-build, we opened 11 new digital home electronics retail stores and closed 2 stores, bringing the total to 240 stores. Additionally, we closed or transferred 16 dedicated communications device stores, resulting in 1 store. As a result, the combined total became 241 stores.

In the operation of mobile carrier stores, including both directly operated stores and franchise stores, through scrap-and-build, we opened or acquired 29 new stores and closed or transferred 22 stores, bringing the total to 942 stores.

In the overseas business, through scrap-and-build, we opened 6 new stores and closed 3 stores, bringing the total to 117 stores.

As a result of the above, the number of stores as of the end of the third quarter of the current consolidated fiscal year is as follows.

Classification	Directly operated stores	Franchises	Total
Operation of digital home electronics retail stores	241	—	241
Digital home electronics retail stores	240	—	240
Dedicated communications device stores	1	—	1
Operation of mobile carrier stores	657	285	942
Carrier stores	618	282	900
Others	39	3	42
Overseas business	117	—	117
Total	1,015	285	1,300

(2) Explanation of financial position

Assets, liabilities and net assets

(Assets)

Total assets as of the end of the third quarter of the current consolidated fiscal year decreased by 45,634 million yen from the end of the previous consolidated fiscal year to 578,175 million yen.

The main breakdown includes a decrease of 46,858 million yen in current assets to 349,817 million yen, and an increase of 1,223 million yen in non-current assets to 228,357 million yen.

The primary factors behind the decrease in current assets were decreases in segregated deposits of 72,041 million yen and trading products of 23,504 million yen, despite increases in cash and deposits of 27,546 million yen, accounts receivable-other of 13,214 million yen, and merchandise and products of 11,930 million yen.

The primary factors behind the increase in non-current assets were increases in investment securities of 6,473 million yen and customer-related intangible assets of 4,366 million yen, despite decreases in contractual intangible assets of 4,016 million yen and goodwill of 3,942 million yen.

(Liabilities)

Total liabilities as of the end of the third quarter of the current consolidated fiscal year decreased by 77,094 million yen from the end of the previous consolidated fiscal year to 338,407 million yen.

The main breakdown includes a decrease of 74,475 million yen in current liabilities to 230,726 million yen, and a decrease of 2,618 million yen in non-current liabilities to 107,681 million yen.

The primary factors behind the decrease in current liabilities were decreases in guaranteed deposits received of 92,398 million yen and accrued income taxes of 6,426 million yen, despite an increase in notes and accounts payable trade of 23,751 million yen.

The primary factors behind the decrease in non-current liabilities were decreases in long-term loans payable of 3,830 million yen and deferred tax liabilities of 843 million yen, despite an increase in contract liabilities of 2,547 million yen.

(Net assets)

Total net assets as of the third quarter of the current consolidated fiscal year increased by 31,459 million yen from the end of the previous consolidated fiscal year to 239,767 million yen, mainly due to an increase in retained earnings of 24,505 million yen.

As a result, the equity ratio improved by 8.0 points compared to the end of the previous consolidated fiscal year, reaching 40.4%.

(3) Information on forward-looking statements such as forecasts for consolidated financial results

*2. Adjustments to segment income consist of companywide costs not distributed among reporting segments.

*3. Segment income is adjusted with ordinary income on the quarterly consolidated income statement.

2. Matters Concerning Changes in Reportable Segments

With the inclusion of VAIO Corporation in the scope of consolidation from the previous consolidated fiscal year, the "Product business" segment has been added to the conventional reporting segments. From the first quarter of the current consolidated fiscal year, the "Paid satellite broadcasting business," previously included in "Other," has been reclassified to the "Media business" segment to more appropriately evaluate performance. Additionally, the "Media business" segment includes Street Holdings Corporation and its subsidiaries (merged into Street Corporation on December 1, 2025, with NJM2 Corporation as the surviving company), which were included in the scope of consolidation during the first quarter. Segment information for the previous nine-month period is presented based on the revised classifications.

3. Information on impairment losses on non-current assets or goodwill for each reportable segment

(Significant impairment losses on non-current assets)

The carrying amount of a group of assets that have recorded a continued loss from business activities is reduced to the recoverable amount and the reduced amount is recorded as an impairment loss under extraordinary loss.

The amount recorded in the reporting segment was 517 million yen for the operation of digital home electronics retail stores and 30 million yen for the operation of mobile carrier stores.

(Significant change in amount of goodwill)

In the "Media business," regarding the business combination with Street Holdings Corporation (merged into Street Corporation on December 1, 2025, with NJM2 Corporation as the surviving company) conducted in the first quarter of the current consolidated fiscal year, the allocation of the acquisition cost had not yet been finalized, and the goodwill amount had been provisionally calculated. However, during the current interim consolidated accounting period, the provisional accounting treatment has been finalized, and the goodwill amount has been revised.

As a result, the provisionally calculated goodwill amount of 9,208 million yen decreased by 3,370 million yen, resulting in 5,837 million yen.
